

Liste des publications de Georges N. Cohen depuis 1941

Articles scientifiques	1
Ouvrages	18
Chapitres d'ouvrages	19
Communications de congrès	21
Posters.....	23

Articles scientifiques

1. Cohen GN (1941) Influence du cuivre sur la formation des mélanines. *Trav. Memb. Soc. Chim. Biol* 23:1504-1507.
2. Cohen GN (1945) Sur l'existence et la constitution d'un complexe adrénalino-molybdique. *Bull Soc Chim Biol* 27:237-240.
3. Cohen GN (1945) Sur l'action oxydante de l'hydrosulfite de sodium sur l'indole. *C R Hebd Séances Acad Sci* 220:708-709.
4. Cohen GN (1945) Sur le premier produit de transformation de l'adrénochrome au cours de la mélanisation de l'adrénaline. *C R Hebd Séances Acad Sci* 220:796-797.
5. Cohen GN (1945) Sur le sort de l'oxoadrénochrome au cours de la mélanisation de l'adrénaline. *C R Hebd Séances Acad Sci* 220:927-928.
6. Cohen GN (1946) Etude sur la mélanisation. Sur le premier produit de transformation de l'adrénochrome au cours de la mélanisation de l'adrénaline. *Bull Soc Chim Biol* 28:104-106.
7. Cohen GN (1946) Etude sur la mélanisation. II. Sur le sort de l'oxoadrénochrome en cours de la mélanisation de l'adrénaline. Structure des mélanines d'origine adrénalinique. *Bull Soc Chim Biol* 28:107-110.
8. Cohen GN (1946) Sur l'existence et la constitution d'un complexe adrénalinouranylique. *C R Hebd Séances Acad Sci* 222:890-891.
9. Cohen GN (1946) Etudes sur la mélanisation. III. A propos d'un article de CLEMO et WEISS sur la formation des mélanines. *Bull Soc Chim Biol* 28:354-357.
10. Cohen GN (1946) La catalyse de l'oxydation de l'adrénaline par les molybdates. *Ann Inst Pasteur (Paris)* 72:644-646.
11. Cohen GN, Prévot AR, & Raynaud M (1946) Nouvelles recherches sur le type fermentaire de *Clostridium corallinum* P. et R. *C R Séances Soc Biol Fil* 140:350-351.
12. Cohen GN, Nisman B, & Raynaud M (1947) Sur la dégradation bactérienne de la choline et de la colamine. *C R Hebd Séances Acad Sci* 225(15):647-650.
13. Cohen GN & Raynaud M (1947) Etude spectrographique du pigment de *Cl. corallinum*. *Ann Inst Pasteur (Paris)* 73:95-98.
14. Cohen-Bazire G, Cohen GN, & Prévot AR (1947) Formation par réaction de Stickland des acides isobutyriques, isovalérianique et valérianique

- optiquement actifs chez un groupe d'anaérobies protéolytiques. *C R Hebd Séances Acad Sci* 226:1143-1144.
15. Macheboeuf MA, Prévot AR, Raynaud M, & Cohen GN (1947) Etude chromatographique du pigment de *Cl. Corallinum*. *Ann Inst Pasteur (Paris)* 73:93-94.
 16. Nisman B, Cohen GN, Raynaud M, & Rosenberg AJ (1947) Etude quantitative du rôle de l'acide pyruvique et de l'acide α -cétoglutarique dans l'inhibition de l'ammoniogénèse, à partir d'acides aminés, chez les bactéries anaérobies. *Bull Soc Chim Biol* 29:650-655.
 17. Nisman B, Raynaud M, & Cohen GN (1947) Mécanisme de la formation des acides aminés chez les bactéries à partir de l'ammoniaque et des acides alpha-cétoniques. *C R Hebd Séances Acad Sci* 225(16):700.
 18. Prévot AR, Cohen GN, & Nisman B (1947) Recherches sur les désaminases de *C1. bifermentans* et de *C1. sordellii*. *Ann Inst Pasteur (Paris)* 73(8):834-836.
 19. Raynaud, Nisman B, & Cohen GN (1947) Etude sur la réaction de Stickland; caractères de l'action inhibitrice de la pénicilline. *Ann Inst Pasteur (Paris)* 73(10):1012-1014.
 20. Cohen GN & Cohen-Bazire G (1948) Fermentation of pyruvate, beta-hydroxybutyrate and of C4-dicarboxylic acids by some butyric acid-forming organisms. *Nature* 162(4119):578.
 21. Cohen GN & Cohen-Bazire G (1948) Couplage oxydo-réducteur des deux réactions fumarate-oxaloacétate et hydroxylamine-ammoniac. Synthèse d'acide aspartique à partir de fumarate et d'hydroxylamine par *Cl. saccharobutyricum*. *C R Hebd Séances Acad Sci* 227:873-875.
 22. Cohen-Bazire G, Cohen GN, Nisman B, & Raynaud M (1948) Action inhibitrice de l'arsénite de sodium sur la production d'acide butyrique, à partir de pyruvate par *Cl. saccharobutyricum*. *C R Séances Soc Biol Fil* 142:1221-1222.
 23. Cohen-Bazire G, Cohen GN, & Prévot AR (1948) Nature et mode de formation des acides volatils dans les cultures de quelques bactéries anaérobies protéolytiques du groupe de *Cl. sporogenes*. Formation par réaction de Stickland des acides isobutyrique, isovalérianique et valérianique optiquement actifs. *Ann Inst Pasteur (Paris)* 75:291-304.
 24. Nisman B, Raynaud M, & Cohen GN (1948) Etude de la réaction de Stickland. *Ann Inst Pasteur (Paris)* 74(4):323-327.
 25. Nisman B, Raynaud M, & Cohen GN (1948) Extension of the Stickland reaction to several bacterial species. *Arch Biochem* 16(3):473.
 26. Saissac R, Raynaud M, & Cohen GN (1948) Variation du type fermentaire des bactéries du groupe de *Cl. sporogenes* sous l'influence du glucose. *Ann Inst Pasteur (Paris)* 75(305-309).

27. Cohen GN (1949) Nature et mode de formation des acides volatils trouvés dans les cultures de bactéries anaérobies strictes. Rapport au Colloque de l'Union Internationale des sciences biologiques (Bruxelles, Mai 1949). *Ann Inst Pasteur (Paris)* 77:471-511.
28. Cohen GN & Cohen-Bazire G (1949) Transformation de l'acide acétylacétique en acides acétique et butyrique par les suspensions de *Cl. acetobutylicum* et de *Cl. butyricum* var. *saccharobutyricum*. *C R Hebd Séances Acad Sci* 228:1531-1533.
29. Cohen GN & Cohen-Bazire G (1949) Etudes sur le mécanisme de la fermentation acétonobutylique. II. Synthèse de butyrate à partir de lactase et d'acétate. *Ann Inst Pasteur (Paris)* 77:729-734.
30. Cohen GN & Minz B (1949) Action de la pantooyltaurine sur la synthèse de l'acétylcholine au niveau de l'intestin « normal » et thyroïdienne. *C R Séances Soc Biol Fil* 143:800-803.
31. Cohen GN, Minz B, & Cohen-Bazire G (1949) Inhibition de la synthèse de l'acétylcholine par le D-2-(pantoylamino)-ethylsulfo-4-nitroanilide. Rétablissement de cette synthèse par le coenzyme A. *C R Hebd Séances Acad Sci* 229:449-451.
32. Cohen-Bazire G & Cohen GN (1949) Direct transformation of fumarate to oxaloacetate, without intermediate formation of malate, by *Clostridium saccharobutyricum*, strain GR 4. *Biochem J* 45(1):41-45.
33. Cohen-Bazire G & Cohen GN (1949) Etudes sur le mécanisme de la fermentation acétonobutylique. I. Synthèse de butyrate à partir de pyruvate. *Ann Inst Pasteur (Paris)* 77:712-728.
34. Minz B & Cohen GN (1949) Rôle de la thyroxine dans la synthèse du coenzyme A, à partir d'acide pantothénique et rôle du coenzyme 1 dans la synthèse de l'acétylcholine dans l'intestin. *C R Séances Soc Biol Fil* 143:803-805.
35. Cohen GN & Cohen-Bazire G (1950) Reduction by molecular hydrogen of acetoacetate to butyrate by butyric acid bacteria. *Nature* 166(4234):1077-1078.
36. Cohen GN & Minz B (1950) Sur les rapports fonctionnels entre la thyroxine et le coenzyme A. *Arch Sci Physiol* 4:145-158.
37. Cohen-Bazire G & Cohen GN (1950) Etudes sur le mécanisme de la fermentation acétono-butylique; formation de butyrate à partir de beta-hydroxybutyrate et d'acétylacétate. *Ann Inst Pasteur (Paris)* 78(5):644-655.
38. Minz B, Cohen GN, & HUNG LEV (1950) Action de l'acide 4-benzyloxy 3,5-diiodobenzoïque (analogue de la thyroxine) sur la synthèse in vivo de

- l'acetylcholine par l'intestin isolé de lapin. *C R Séances Soc Biol Fil* 144(3-4):203-206.
39. Nisman B, Cohen-Bazire G, & Cohen GN (1950) Existence d'un β -hydroxybutyrique déshydrogénase chez les bactéries anaérobies. *C R Hebd Séances Acad Sci* 231:421-424.
 40. Cohen GN (1951) Metabolism of bacteria. *Annu Rev Microbiol* 5:71-100.
 41. Cohen GN, Hirsch ML, & Raynaud M (1951) Inhibition compétitive de la croissance d'un mutant de *Escherichia coli* exigeant la valine par la L-isoleucine et renversement non compétitif de l'inhibition par la L-leucine. *C R Hebd Séances Acad Sci* 233(14):765-767.
 42. Cohen GN & Cohen-Bazire G (1952) Etudes sur le mécanisme de la fermentation acétono-butylique. IV. Réduction de l'acétylacétate en butyrate par l'hydrogène moléculaire. *Biochim Biophys Acta* 8(4):459-465.
 43. Cohen GN & Hirsch ML (1953) La thréoninesynthase, système enzymatique synthétisant la L-thréonine à partir de la L-homosérine. *C R Hebd Séances Acad Sci* 236(12):1302-1304.
 44. Cohn M, Cohen GN, & Monod J (1953) L'effet inhibiteur spécifique de la méthionine dans la formation de la méthionine-synthase chez *Escherichia coli*. *C R Hebd Séances Acad Sci* 236(7):746-748.
 45. Hirsch ML & Cohen GN (1953) Transformation de l'acide L-aspartique en L-threonine par l'intermédiaire de la L-homosérine chez *Escherichia coli*. *C R Hebd Séances Acad Sci* 236(24):2338-2340.
 46. Hirsch ML & Cohen GN (1953) Amino-acid utilization in bacterial growth. I. Peptide utilization by a leucine-requiring mutant of *Escherichia coli*. *Biochem J* 53(1):25-30.
 47. Nisman B, Cohen GN, Wiesendanger S, & Szulmajster J (1953) La dégradation du β -hydroxybutyrate par les extraits de *Clostridium saccharobutyricum*. *C R Hebd Séances Acad Sci* 237(25):1806-1809.
 48. Amos H & Cohen GN (1954) Amino acid utilization in bacterial growth. II. A study of threonine-isoleucine relationships in mutants of *Escherichia coli*. *Biochem J* 57(2):338-343.
 49. Cohen GN & Hirsch ML (1954) Origine des chaînes carbonées de la valine et de la leucine chez *Escherichia coli*. *C R Hebd Séances Acad Sci* 239(23):1709-1710.
 50. Cohen GN & Hirsch ML (1954) Threonine synthase, a system synthesizing L-threonine from L homoserine. *J Bacteriol* 67(2):182-190.

51. Cohen GN, Hirsch ML, Wiesendanger SB, & Nisman B (1954) Précisions sur la synthèse de L-thréonine à partir d'acide L-aspartique par des extraits de *Escherichia coli*. *C R Hebd Séances Acad Sci* 238(17):1746-1748.
52. Hirsch ML & Cohen GN (1954) Mise en évidence d'un système synthétisant la L-homosérine à partir de l'acide L-aspartique. *Biochim Biophys Acta* 15(4):560-567.
53. Nisman B, Cohen GN, Wiesendanger SB, & Hirsch ML (1954) Transformation de l'acide aspartique en homosérine et en thréonine par des extraits de *Escherichia coli*. *C R Hebd Séances Acad Sci* 238(12):1342-1344.
54. Szulmajster J, Nisman B, & Cohen GN (1954) Sur le mécanisme de la formation des acides gras inférieurs chez les Clostridies. I. Mise en évidence de la thiolase et de la β -cétohydrogénase. *C R Hebd Séances Acad Sci* 231:164-166.
55. Cohen GN & Rickenberg HV (1955) Existence d'accepteurs spécifiques pour les aminoacides chez *Escherichia coli*. *C R Hebd Séances Acad Sci* 240(21):2086-2088.
56. Cohen GN & Rickenberg HV (1955) Etude directe de la fixation d'un inducteur de la beta-galactosidase par les cellules d'*Escherichia coli*. *C R Hebd Séances Acad Sci* 240(4):466-468.
57. Buttin G, Cohen GN, Monod J, & Rickenberg HV (1956) La galactoside-permease d'*Escherichia coli*. *Ann Inst Pasteur (Paris)* 91(6):829-857.
58. Cohen GN & Munier R (1956) Incorporation d'analogues structuraux d'acides aminés dans les protéines bactériennes. *Biochim Biophys Acta* 21(3):592-593.
59. Cohen GN & Rickenberg HV (1956) Concentration spécifique réversible des acides aminés chez *Escherichia coli*. *Ann Inst Pasteur (Paris)* 91(5):693-720.
60. Trudinger PA & Cohen GN (1956) The effect of 4-methyltryptophan on growth and enzyme systems of *Escherichia coli*. *Biochem J* 62(3):488-491.
61. Cohen GN & Cowie DB (1957) Remplacement total de la méthionine par la sélénométhionine dans les protéines d'*Escherichia coli*. *C R Hebd Séances Acad Sci* 244(5):680-683.
62. Cohen GN & Monod J (1957) Bacterial permeases. *Bacteriol Rev* 21(3):169-194.
63. Cowie DB & Cohen GN (1957) Biosynthesis by *Escherichia coli* of active altered proteins containing selenium instead of sulfur. *Biochim Biophys Acta* 26(2):252-261.

64. Cohen GN (1958) Synthèse de protéines anormales chez *Escherichia coli* K 12 cultivé en présence de L-valine. *Ann Inst Pasteur (Paris)* 94(1):15-30.
65. Cohen GN & Adelberg EA (1958) Kinetics of incorporation of p-fluorophenylalanine by a mutant of *Escherichia coli* resistant to this analogue. *J Bacteriol* 76(3):328-330.
66. Halvorson HO & Cohen GN (1958) Incorporation des amino-acides endogènes et exogènes dans les protéines de la levure. *Ann Inst Pasteur (Paris)* 95(1):73-87.
67. Cohen GN & Jacob F (1959) Sur la répression de la synthèse des enzymes intervenant dans la formation du tryptophane chez *E. coli*. *C R Hebd Séances Acad Sci* 248:3490-3492.
68. Cohen GN & Munier R (1959) Effets des analogues structuraux d'aminoacides sur la croissance, la synthèse de protéines et la synthèse d'enzymes chez *Escherichia coli*. *Biochim Biophys Acta* 31(2):347-356.
69. Cowie DB, Cohen GN, Bolton ET, & Robichon-Szulmajster H, de (1959) Amino acid analog incorporation into bacterial proteins. *Biochim Biophys Acta* 34:39-46.
70. Munier R & Cohen GN (1959) Incorporation d'analogues structuraux d'aminoacides dans les protéines bactériennes au cours de leur synthèse in vivo. *Biochim Biophys Acta* 31(2):378-391.
71. Cohen GN & Gros F (1960) Protein biosynthesis. *Annu Rev Biochem* 29:525-546.
72. Stadtman ER, Cohen GN, Le Bras G, & Robichon-Szulmajster H, de (1961) Selective feedback inhibition and repression of two aspartokinases in the metabolism of *Escherichia coli*. *Cold Spring Harb Symp Quant Biol* 26:319-321.
73. Stadtman ER, Cohen GN, Le Bras G, & Robichon-Szulmajster H, de (1961) Feedback inhibition and repression of aspartokinase activity in *E. coli* and *Saccharomyces cerevisiae*. *J Biol Chem* 236:513-516.
74. Stadtman ER, Cohen GN, & Lebras G (1961) Feedback inhibition and repression of aspartokinase activity in *Escherichia coli*. *Ann N Y Acad Sci* 94:952-959.
75. Patte JC, Loviny T, & Cohen GN (1962) Répression de la décarboxylase de l'acide méso-alpha-epsilon-diaminopimélate par la L-lysine chez *E. coli*. *Biochim Biophys Acta* 58:359-360.
76. Cohen GN & Patte JC (1963) Some aspects of the regulation of amino acid biosynthesis in a branched pathway. *Cold Spring Harb Symp Quant Biol* 28:513-516.

77. Cohen GN, Patte JC, & Boezi J (1963) Dérépression coordonnée de la lysine-aspartokinase et de la semi-aspartaldéhyde déshydrogénase chez *Escherichia coli*. *C R Hebd Séances Acad Sci* 256:2939-2941.
78. Patte JC, Le Bras G, Loviny T, & Cohen GN (1963) Rétro-inhibition et répression de l'homosérine déshydrogénase d' *E. coli*. *Biochim Biophys Acta* 67:16-30.
79. Patte JC & Cohen GN (1964) Parallélisme entre les effets protecteur et inhibiteur de la l-lysine sur une aspartokinase de *Escherichia coli*. *C R Hebd Séances Acad Sci* 259:3882-3884.
80. Patte JC & Cohen GN (1964) Interactions coopératives effecteur-effecteur chez deux enzymes allostériques inhibées de manière non compétitive. *C R Hebd Séances Acad Sci* 259:1255-1258.
81. Patte JC & Cohen GN (1964) Parallélisme entre les effets protecteurs et inhibiteurs de la L-lysine sur une aspartokinase de *E. coli*. *C R Acad Sci Hebd Séances Acad Sci D* 259:3882-3884.
82. Cohen GN (1965) Regulation of enzyme activity in microorganisms. *Annu Rev Microbiol* 19:105-126.
83. Cohen GN, Patte JC, & Truffa-Bachi P (1965) Parallel modifications caused by mutations in two enzymes concerned with the biosynthesis of threonine in *Escherichia coli*. *Biochem Biophys Res Commun* 19:546-550.
84. Patte JC & Cohen GN (1965) Isolement et propriétés d'un mutant d'*Escherichia coli* dépourvu d'aspartokinase sensible à la lysine. *Biochim Biophys Acta* 99(3):561-563.
85. Patte JC, Loviny T, & Cohen GN (1965) Effets inhibiteurs coopératifs de la L-lysine avec d'autres amino acides sur une aspartokinase de *Escherichia coli*. *Biochim Biophys Acta* 99(3):523-530.
86. Patte JC, Truffa-Bachi P, & Cohen GN (1966) The threonine-sensitive homoserine dehydrogenase and aspartokinase activities of *E. coli*. I. Evidence that the two activities are carried by a single protein. *Biochim Biophys Acta* 128:426-439.
87. Truffa-Bachi P & Cohen GN (1966) La beta-aspartokinase sensible à la lysine d'*Escherichia coli*; purification et propriétés. *Biochim Biophys Acta* 113(3):531-541.
88. Truffa-Bachi P, Le Bras G, & Cohen GN (1966) The threonine-sensitive homoserine dehydrogenase and aspartokinase activities of *E. coli*. II. The effects of p-mercuribenzoic acid. *Biochim Biophys Acta* 128:440-449.

89. Truffa-Bachi P, Le Bras G, & Cohen GN (1966) The threonine-sensitive homoserine dehydrogenase and aspartokinase activities of E. coli. III. *Biochim Biophys Acta* 128:450-453.
90. Cohen GN (1967) Die regulation der Enzym-synthese und Enzym-aktivität. *Umsch Wiss Tech* 11:360.
91. Janin J, Truffa-Bachi P, & Cohen GN (1967) Subunits of the complex protein carrying the threonine-sensitive aspartokinase activity in a mutant of Escherichia coli K 12. *Biochem Biophys Res Commun* 26(4):429-434.
92. Patte JC, Le Bras G, & Cohen GN (1967) Regulation by methionine of the synthesis of a third aspartokinase and of a second homoserine dehydrogenase in Escherichia coli K 12. *Biochim Biophys Acta* 136(2):245-247.
93. Truffa-Bachi P, Patte JC, & Cohen GN (1967) Sur la dihydrodipicolinate synthétase d'Escherichia coli K12. *C R Acad Sci Hebd Séances Acad Sci D* 265(13):928-929.
94. Richaud F & Cohen GN (1968) Selection of Escherichia coli mutants devoid of one or of both the activities carried by a multifunctional protein. *Biochem Biophys Res Commun* 30(1):45-49.
95. Truffa-Bachi P & Cohen GN (1968) Some aspects of amino acid biosynthesis in microorganisms. *Annu Rev Biochem* 37:79-108.
96. Truffa-Bachi P, Van Rapenbusch R, Janin J, Gros C, & Cohen GN (1968) The threonine-sensitive homoserine dehydrogenase and aspartokinase activities of Escherichia coli K 12. 4. Isolation, molecular weight, amino acid analysis and behaviour of the sulphhydryl groups of the protein catalyzing the two activities. *Eur J Biochem* 5(1):73-80.
97. Cohen GN, Stanier RY, & Le Bras G (1969) Regulation of the biosynthesis of amino acids of the aspartate family in Coliform bacteria and Pseudomonads. *J Bacteriol* 99(3):791-801.
98. Falcoz-Kelly F, van Rapenbusch R, & Cohen GN (1969) The methionine-repressible homoserine dehydrogenase and aspartokinase activities of Escherichia coli K 12. Preparation of the homogeneous protein catalyzing the two activities. Molecular weight of the native enzyme and of its subunits. *Eur J Biochem* 8(1):146-152.
99. Janin J & Cohen GN (1969) The threonine-sensitive homoserine dehydrogenase and aspartokinase activities of Escherichia coli K 12. A study of the allosteric equilibrium. *Eur J Biochem* 11(3):520-529.

Communications de congrès

1. Inter-relationships of P-aminobenzoic acid and pteroylglutamic acid with regard to sulphonamide action.
Cohen GN, Lascelles J, Marshall JH, Nimmosmith RH, Woods DD
1st International Congress of Biochemistry, Cambridge, 19-25 August, 1949 :
abstracts of communications : 456-8
2. Sur le mécanisme de la fermentation acéto-butyrrique
Cohen GN, Cohen-Bazire G
1st International Congress of Biochemistry, Cambridge, 19-25 August, 1949 :
abstracts of communications : 555-6
3. Synthesis and utilization of threonine by mutants of E. coli
Amos H, Cohen GN
2eme congrès international de biochimie : Paris 21-27 juillet 1952 : résumés
des communications : 73
4. Analyse de l'inhibition compétitive de mutants de E. coli exigeant la valine
par une série d'acides aminés
Hirsch ML, Cohen GN
2eme congrès international de biochimie : Paris 21-27 juillet 1952 : résumés
des communications : 82
5. Repression and end product inhibition in a branched biosynthetic pathway
Cohen GN, Patte JC, Truffa-Bachi P, Sawas C, Doudoroff M
Mécanismes de régulation des activités cellulaires chez les microorganismes :
actes du colloque international du C.N.R.S. n° 124 organisé à Marseille du 23
au 27 juillet 1963 : 243-
6. Intra- and interprotomeric interactions between the catalytic regions of
aspartokinase I-homoserine dehydrogenase I from E. coli K12
Veron M, Cohen GN
Third International Symposium on the Metabolic Interconversion of enzymes,
held in Seattle, June 5-8, 1973 : 335-347
7. Organization of the human transferrin gene
Schaeffer E, Park I, Cohen GN, Zakin MM
Proteins of iron storage and transport : proceedings of the 7th International
Conference on Proteins of Iron Metabolism held in Villeneuve d'Ascq
(France), 30 June-5 July, 1985 : 361-
8. The human transferrin gene : organization, evolution and specific
transcriptional signals
Zakin MM, Schaeffer E., Brunel F, Boissier F, Cohen GN
Regulation of liver gene expression : Abstracts of papers presented at the
1987 meeting on regulation of liver gene expression, April 29-May 3, 1987 :
158

9. Specific transcriptional signals of the human transferrin gene control region
Schaeffer E, Brunel F, Boissier F, Cohen GN, Zakin MM
Eighth International Conference on Proteins of Iron Transport and Storage,
Montebello, Canada, May 1987 : 11
10. Proposal for the adoption by the United Nations of an additional article to
Universal Declaration of human rights
Cohen GN
In : Fujiki N, Bulyzhenkov V, Bankowski Z ...[et al.] (eds.) Medical genetics
and society : based on the International Panel discussion on education and
ethics in medical genetics held at Fukui, Japan, on Aug. 3, 1990. Amsterdam
: Kugler Publication, 1991 : 9-13
11. Genome annotation: What can we learn in biochemical reactions?
Cohen Georges
Bioinformatics and Genome Data Analysis course, held in Sfax, Tunisia, March
23-April 2, 2005.
http://www.pasteur.fr/~tekaia/BGDA/G_Cohen_Conference.pdf
12. Génétique environnementale et épigénétique ou la réhabilitation de
Lamarck
David B, Cohen GN, Dessaint JP
XXXIIème Journée du G.A.I.C.R.M., Suze-La-Rousse, 21 mars 2009 : 8- 13

Posters

1. Sequencing and analysis of acinetobacter sp. ADP1 genome: toward an experimental tool for investigation of microbial metabolism
Barbe V, Vallenet D, Labarre L, Fonknechten N, Wincker P, Duprat S, Oztas S, Robert C, Weissenbach J, Medigue Cl, Cohen GN, Ornston N, Marlière Ph.
The European Conference on Prokaryotic Genomes. Oct. 5 - 8, 2003.
Göttingen, Germany.
2. Amaze: a database of molecular function interaction and biochemical processes
Lemer Chr, Naim A, Zhang Y, Croes D, Cohen GN, Mukherjee G, Wernisch L, Walter K, Richelle J, Van Helden J, Wodak SJ
In : Hicks MG, Kettner C (Eds.) Molecular Informatics: Confronting Complexity. Proceedings of the Beilstein-Institut Workshop, May 13 - 16, 2002, Bozen, Italy.
<http://www.beilstein-institut.de/bozen2002/proceedings/contents/contents.html>
3. Singular features revealed by the genome sequence of *Acinetobacter sp. ADP1*, a versatile and naturally transformation competent bacterium
Barbe V., Vallenet D., Fonknechten N., Kreimeyer A., Oztas S., Labarre L., Robert C., Duprat S., Wincker P., Ornston L.N., Weissenbach J., Marlière P., Cohen G.N, and Médigue C.
6th International Symposium on the Biology of Acinetobacter, September 15-17, 2004 Dublin, Ireland.
4. Comparative sequence analysis of pathogenic and non-pathogenic Acinetobacter species
Barbe V., Vallenet D., Robert C., Ségurens B., Wincker P., Cohen G., Labarre L., Médigue C., Raoult D., Claverie J.M., Drancourt M., and Weissenbach J.
6th International Symposium on the Biology of Acinetobacter, September 15-17, 2004 Dublin, Ireland.
